Subject: Extension request for Scranton SC 843-373-3
Importance: High

Good morning Mr. McDaniel and Mr. Pratt,

On behalf of AT & T Mobility, I've attached an extension request for Scranton, SC 843-373-3. We anticipate having this block in service within the next 30 – 45 days.

In brief, if we return this block our MTE will fall to less than 1 month of sales. Currently, there are no resources in the pool and we would be forced to wait at least 66 days before another block was available.

Please feel free to let me know if you have any questions or require additional information. Thank you for your assistance!

Number Reclamation - Extension Check List and Form

Information required for Part 4 extension of Code or Thousands-block(s)

Note: Parts 4s are due 6 months past the LERG effective date unless extenuating circumstances can be demonstrated.

1. NPA-NXX or NPA-NXX-X													
2. Rate Center	Scranton SC												
4. Part 4 Due Date	1-16-2008												
5. LERG Effective Date	7-17-2007												
6. When will code/block be put into service?	The week of 1-28-2008												
7. Duration of extension (30, 60 or 90 days)	30 days												
8. Is this an Initial or Growth code/block?	Growth												
9. Is code/block to be used for its original purpose (did we move rate centers, etc?).	Yes / its original purpose												
10. Why is the code/block delayed? Please provide the details for the impacts to Cingular if the code/block was returned and new resources were requested instead of an extension.	Delayed due to holidays sales not as high as expected. There are no new resources available in the numbering pool. Therefore an extension is requested												
11. Has Cingular been contacted by the State Commission, FCC, NANPA or the PA? If yes, please include contact information.	No												
12. Would Cingular qualify for an initial or growth code/block today (if the extension were not granted)?	Yes, however with the 66 day turn around time on a code we will exhaust numbers in this rate center.												
13. Attach appropriate report (Char, CARE or TLG) detailing number utilization and MTE for the rate center.	<table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <tr> <th colspan="4">** Calculations **</th> </tr> <tr> <td style="width: 25%;">6214 UTILI Z %</td> <td style="width: 25%;">6010 UTILI Z %</td> <td style="width: 25%;">NET ADDS</td> <td style="width: 25%;">UNOFFICI AL MTE</td> </tr> <tr> <td>0.74</td> <td>0</td> <td>89</td> <td>12.83</td> </tr> </table>	** Calculations **				6214 UTILI Z %	6010 UTILI Z %	NET ADDS	UNOFFICI AL MTE	0.74	0	89	12.83
